- Leadership opportunities in a team environment
- Exposure to diverse projects and new technology
- Professional growth through interactive training
- Customized career development

Project Engineer Rotations

Want to be part of the action?

Check out the rewards and opportunities of the Project Engineer Program at Structural Group – a diversified and innovative group comprised of three companies: Structural Preservation Systems, VSL, and Pullman Power. After hire by one of the companies, apply your knowledge and develop skills while working on a variety of challenging projects in a progressive and innovative team environment.

The Project Engineer Program provides you with the opportunity to customize your career path based on your interests and goals. From day one, you experience all aspects of construction in commercial, industrial and public environments. Mentors from different areas of expertise will help you attain a well-rounded knowledge leading to exciting opportunities for professional development.

Explore cutting edge technologies such as structural repair and protection, post-tensioning systems, strengthening systems, new construction systems, and geotechnical services. Contact us today to explore the tremendous opportunities available with a Structural Group company.

As a Project Engineer you will assist in:

- Project management support
- Estimating
- Budget preparation
- Job cost management
- Scheduling
- Production rate tracking
- Client relations
- Safety management
- Quality control management
- Engineering and design support
- Business development

Successful candidates will possess:

- A degree in engineering (civil, structural, mechanical, geotechnical), construction management, industrial technology, geology or a related field
- Strong verbal and written communication skills
- Excellent documentation and organizational skills
- Strong computer skills
- A positive outlook and a team spirit
